

COURSE OUTLINE: RIVERBED STEELHEAD & MOBILE FAST-TRACK

OBJECTIVE

Upon completion of the course, you will be able to:

- List the features of the Steelhead appliances and the Steelhead Mobile Controller (SMC) and Client
- Navigate within the Management Console (GUI), the Command Line Interface (CLI) and SMC GUI.
- Configure and deploy the Steelhead appliances and mobile clients in various network deployment scenarios
- Size the Steelhead appliances for a given network
- Perform network integration
- Perform basic troubleshooting and identify any potential problems that might occur when deploying the products

DESCRIPTION

Riverbed Steelhead and Mobile Fast-Track course is a five-day, lab-intensive course delivered by Riverbed technical experts. This task-oriented, 'hands on' course imparts the knowledge and skills needed to deploy and administer Riverbed Steelhead appliances and mobile clients in complex network environments. Delegates work in pairs with a PC each, mobile controllers connecting to a shared server across a simulated WAN using a Network Nightmare WAN simulator. Due to the fast-track nature of this course extended hours may be required on certain days, though this will be kept to a minimum.

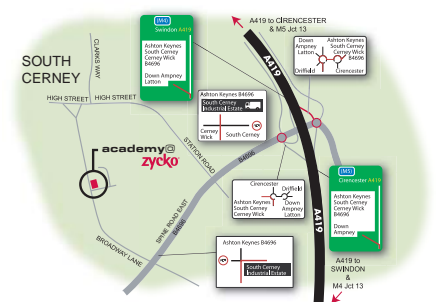

AUDIENCE

Riverbed Steelhead and Mobile Fast-Track is targeted specifically for Riverbed resellers/partners and customers involved in the design, deployment, or administration/technical support of Steelhead appliances and the mobile client.

DURATION: 5 DAYS

LOCATION & ACCOMMODATION

We have various training facilities across the UK. We are based at our UK HQ in the Cotswold Water Park near to Cirencester, Gloucestershire. A map is available on our website, however, prior to the course you will be sent a full information pack including a map to the training location. If you require accommodation, we can recommend options near to our venues. Please note that Academy@ is not responsible for booking delegate accommodation, but should you have any problems booking into any of these hotels or require more accommodation options, please contact us.

PRE-REQUISITES

- Certification as a CCNA or the equivalent internetworking knowledge extremely helpful (routing protocols, TCP/IP, network design, and troubleshooting)
- Basic knowledge of the Linux operating system is helpful but not required

COURSE CONTENT:

RIVERBED STEELHEAD & MOBILE FAST-TRACK

COURSE TOPICS

- Course Overview
- Riverbed Product Overview
- Steelhead Connection Interception
- Riverbed Deployment Options
- Transaction Prediction
- SDR - Only Optimisations monitoring and reporting
- Top Deployment Problems & Troubleshooting
- Riverbed Services Platform (RSP)
- RiOS HighSpeed TCP (HS-TCP) Optimization
- Performance Tuning
- Deployment Planning
- Agentless CIFS Prepopulation
- Quality of Service (QoS)
- Steelhead Mobile Product Overview
- SMC Initial Configuration
- Steelhead Mobile Client
- Steelhead Mobile Controller Configuration
- Steelhead Appliance & Steelhead
- Mobile Interoperability
- Location Awareness/Auto-detection
& Branch warming
- SSL Configuration
- Other features and reporting
- SMC - Virtual Edition (VE)
- Course Summary
